GASSER ELSHORBAGY

Java developer

PROFILE

I'm a passionate learner with hands-on experience in Java, including both the fundamentals and Object-Oriented Programming (OOP). I've developed a solid understanding of OOP principles like encapsulation, inheritance, and I enjoy solving problems by writing clean and efficient code. I'm always eager to expand my skills and take on new challenges in programming.
Ready to contribute my knowledge and grow in a collaborative environment

SKILLS

JAVA
JDBC
MS-SQL
HTML
Servlet
Microsoft office

EDUCATION

Shrouk Academy
2024 - 2028
Learning Computer Science, focusing on foundational programming skills, algorithms, and software development

Java OOP course
skilled in java programing with experience in developing testing and maintain efficient software solution. Eager to apply object-oriented programming principles in real-world projects.

Microsoft SQL course
I studied Microsoft SQL Server, developing a strong foundation in database design, management, and query optimization. Gained practical experience through various projects

Servlets & Html
Developed dynamic web applications by integrating HTML forms with Servlet controllers to handle user inputs, process data, and return customized responses. Worked with databases to store and retrieve user data and implemented session management in Servlets to maintain user states across requests. Used JDBC for database connectivity and optimized web application performance, creating a seamless user experience.

PROJECTS

Shopping Website
I designed and developed a shopping website that allows users to buy any object, and the data of users, including their login information and purchase history, is stored in a database after they make a purchase.
